lyntia.com

lyntia the company

lyntia is a **neutral operator** in the **wholesale telecom sector** offering fibre optic connectivity services that boast wide **network coverage** and high **capillarity: over 48,211 km of deployed fibre optic**.

lyntia shareholders

Lyntia Networks was acquired in January 2023 by a business consortium made up of Axa IM Alts, Swiss Life Asset Managers and Morrison & Co.

Axa IM Alts is a global investment leader specialising in alternative asset classes, investing across the capital stack, in private and listed markets and delivering contant performance for its clients.

Swiss Life Asset Managers is a leading asset manager that offers and develops tailored investment strategies for its own insurance companies as well as for third-party clients, such as pension funds, investment foundations, asset managers and private clients.

Morrison & Co is a leading alternative asset manager investing in infrastructure through both private and listen markets.

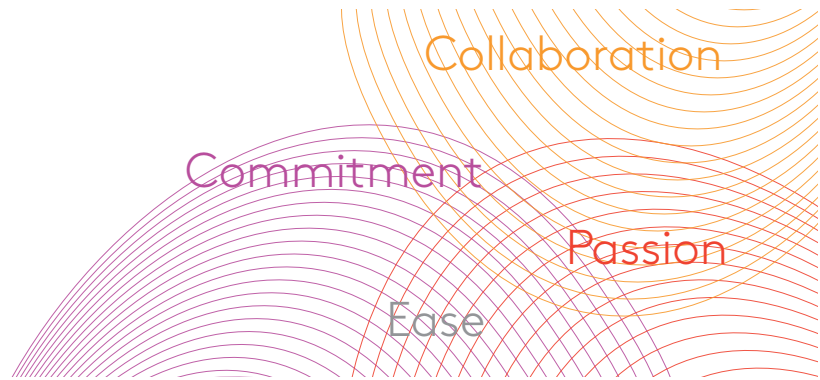

lyntia values

Collaboration: we always achieve our goals as a team.

Commitment: to our customers' needs.

Passion: for our work and the future that awaits us.

Ease: we improve to achieve maximum efficiency.

lyntia logo

Logo: vertical and horizontal versions

Typographic code: lyntia must always be written in lower case, even at the beginning of a sentence or when it is part of a headline.

lyntia yesterday

lyntia originated from Ufinet, a company founded in 1998 that over the years has expanded its services and opened new markets in America.

lyntia today

lyntia provides a wide range of connectivity services: dark fibre, spectrum, capacity, VPN, cloud connect and colocation. All to make communications possible, simple and secure.

lyntia in Spain

lyntia's fibre optic network covers all of Spain and Portugal, connecting Spain's major cities and providing services to around 1,200 towns and cities. In addition, lyntia has connections with major underwater cable landing stations in the Iberian Peninsula.

lyntia worldwide

lyntia's objective is to link countries, unite cities and connect businesses. That's why, today lyntia operates in Spain and Portugal and has interconnections with France, Germany and the United Kingdom.

lyntia clients

- Operators: National, international and local
- Carriers
- Hyperscalers
- Utility companies
- Data Centres
