

lyntia
NETWORK TO BUSINESS

Connecting
the present.
Driving
the future.

WELCOME LETTER

At lyntia, we believe in the power of connectivity as a driver of transformation.

We are a leading neutral wholesale operator in the telecommunications sector, focusing on providing robust, secure and sustainable solutions. Our network, vision and committed team operate every day to ensure an interconnected and accessible digital future for all.

José Antonio López,
CEO of lyntia Networks

Francisco Román,
Chairman of lyntia Networks

ABOUT US

We are the leading neutral operator in the wholesale telecommunications market, **with more than 56,000 km of fibre optic** rolled out across the Iberian Peninsula.

OUR MODEL

We focus on providing high-capacity connectivity solutions designed to meet the needs of technology companies, operators, system integrators and public entities.

WHERE WE OPERATE

We operate in Spain and Portugal, with **international interconnections to France, Germany and the United Kingdom.**

OUR HISTORY

With **more than 25 years of experience**, our origins date back to 1998 when we were part of Ufinet. Today, we are backed by Axa IM Alts, Swiss Life Asset Managers and Morisson & Co.

OUR COMPETITIVE EDGE

- 100% wholesale neutral operator
- Extensive territorial coverage
- National coverage and international connections: coverage across the Iberian Peninsula with international connections
- Connections to the main submarine cable landing points
- Tailor-made solutions for telco, cloud and hyperscaler customers
- Cross-cutting ESG commitment in our strategy: ESG commitment across our entire value chain.

PRODUCTS AND SERVICES

OPTICAL

Spectrum •

Dedicated optical spectrum allocation for customers who need high capacity and scalability in their network.

Wavelength •

Point-to-point services over dedicated wavelengths, with high speed and guaranteed availability.

INFRASTRUCTURE

• **Colocation**

Secure, equipped spaces to house telecommunications equipment at strategic points along the lyntia network.

• **Dark fibre**

Dedicated unlit fibre-optic cable designed for operators that require total control over their network.

CONNECTIVITY

• **Ethernet Connect**

Flexible and secure point-to-point Ethernet connectivity solution for corporate networks or between main offices.

• **Internet Connect**

High-capacity Internet access, adaptable to the needs of operators, carriers and large accounts.

• **IP VPN Connect**

Virtual private network to securely connect multiple locations through shared infrastructure.

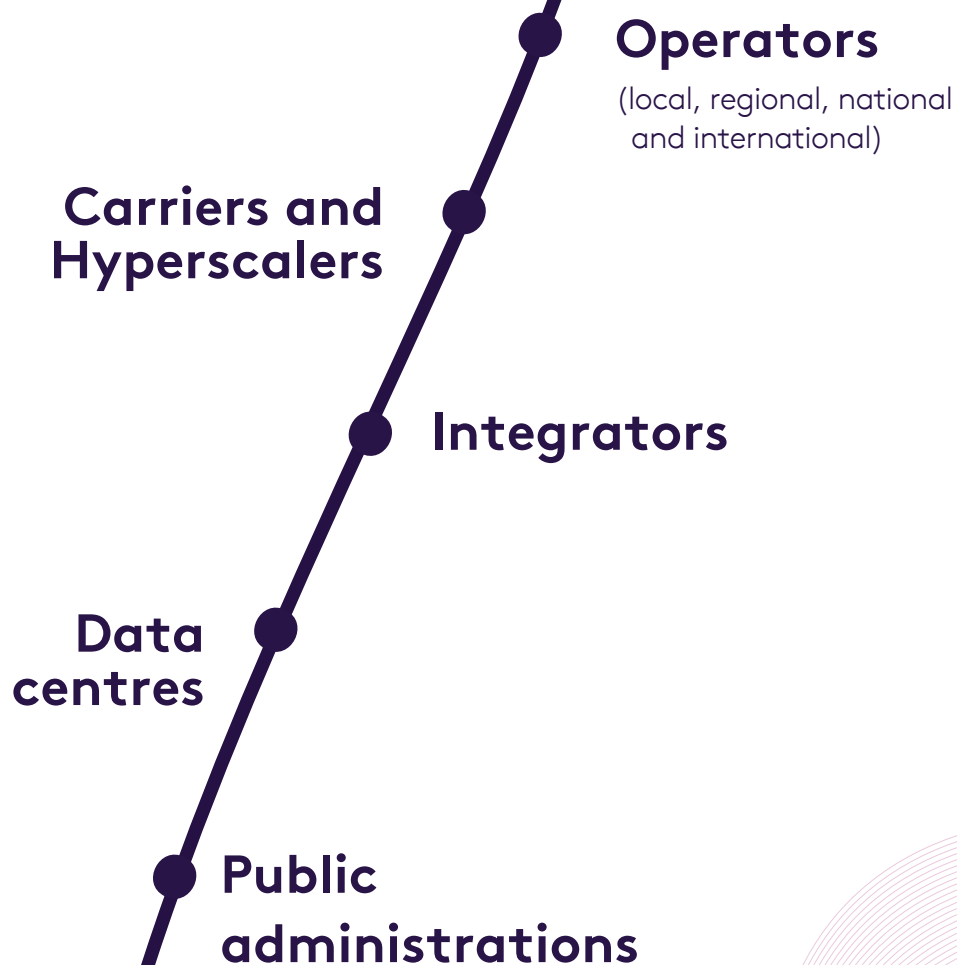

• **Cloud Connect**

Private and direct access to leading cloud service providers (AWS, Azure, Google Cloud, etc.).
