

IP TRANSIT

With lyntia's Internet access service you will enjoy direct connectivity to the Internet through our backbone with transit to Tier-1 Spanish and international ISPs. A service designed to provide high-speed, high-performance access. To do this, we have peering agreements with the world's leading Internet networks. With competitive prices and excellent customer service.

CONFIGURATION POSSIBILITIES

- IP Transit or DIA configuration.
- Security: DDoS mitigation service provided by default (Blackholing) If necessary, we can also provide active IP filtering. We also offer a clean traffic service with DDoS attack filtering.
- Monitoring: Possible SNMP configuration to monitor services individually.
- LAN configuration of active ports aggregated in LAF, L2 switched ports and routed ports.
- Public IP addressing: Native IPv4 and IPv6 support (dual stack).
- Port types: Fast Ethernet (FastE), Gigabit Ethernet (GigE) and 100 Gigabit Ethernet (100 GigE).

ADVANTAGES

- AS202766 proprietary autonomous system.
- Multicarrier platform with national and international transit connections with the main operators.
- Peering with the main content providers (Google, Facebook, Netflix, etc.) and presence in DE-CIX as the internet exchange point.
- Complete access redundancy to guarantee defined SLAs.
- Flexibility and scalability: Choose from different connection options that allow you to grow comfortably.
- 100% redundant core, with the possibility of offering accesses protected end-to-end.
