

# INTERNET ACCESS

lyntia  
NETWORK TO BUSINESS

With lyntia internet access, you'll have direct online connectivity through our backbone with transit to national and international tier-1 ISPs. Because this service is designed to facilitate high capacity access with superior performance, we hold peering agreements with the most important internet networks worldwide, with competitive prices and excellent customer service.

## CONFIGURATION OPTIONS

- DIA or IP transit.
- Security: DDoS attack mitigation service by default (blackholing). If necessary, we will perform active IP filtering. We also offer a clean traffic service to filter DDoS attacks.
- Monitoring: possible SNMP setup to monitor services individually.
- LAN configuration of active ports included in LAF, L2 switch ports and routed ports.
- Public IP addressing: support for native IPv4 and IPv6 (dual stack).
- Port types: Fast Ethernet (FastE), Gigabit Ethernet (GigE), and 100 Gigabit Ethernet (100 GigE).

## ADVANTAGES

- Multicarrier platform with national and international transit connections with key operators.
- Peering with the main content providers (Google, Facebook, Netflix, etc.) and presence on DE-CIX as an internet exchange point.
- Total access redundancy to guarantee defined SLAs.
- Flexibility and scalability: choose between different connection options that allow you to grow your business comfortably.
- 100% redundant CORE with the possibility of protected end-to-end access.

Clients have the ability to perform lyntia server speed tests by accessing the speed test option and selecting lyntia Networks S.A.
